Letter of Recommendation

4th March 2021

To whom it may concern,

I am the director of Melike Altınışık Architects (MAA) , architectural design firm based in İstanbul and Seoul. MAA, as an award-winning architecture office, is dedicated to develop an innovative approach towards architecture, urbanism and design. We aim to develop the relational thinking capacities of the architecture in its relation with design technologies. MAA's work is in varying scales from high-rise buildings, masterplans , conference centers and museums to bespoke furniture designs. Our work includes prize winning projects such as 369m tall futuristic İstanbul TV-Radio Tower (İstanbul, Turkey - Built) and Seoul Robot Science Museum (Seoul, S.Korea - Ongoing).

I am writing this letter to confirm Ms Deniz Güvendi's past internship in MAA - Melike Altınışık Architects. I have known Deniz during almost 5 months period of her internship, she worked on the national and International projects / competition projects (2020 Summer) in which she demonstrated all the qualities that employers would find valuable. She was responsible for working together with senior designers on certain architectural design projects. She accomplished delivering the tasks of our office, which involves in-depth communication with co-workers, interpreting design solutions and documenting architectural drawings.

Our office MAA greatly values the synthesis of theoretical studies with practical training. As a result of such concern, we are pleased to accept interns who are competent with our demands. It is apparent that Deniz meets with our requirements.

This combination of ability when coupled with Deniz's enthusiasm, provides a potent recipe for an ideal student. I have every confidence that she will bring her energy, optimism and creativity to her further studies in architecture and design.

If you would like further information about Deniz's internship with Melike Altınışık Architects, please feel free to contact me.

Faithfully yours,
Kindest regards.

Melike Altınışık
